For digital Switzerland. For Sure.

Known Security Issues VOTING Wahlvorschlag

ID	Title	Summary
VOTING-6390	Submission Deadlines	The submission deadlines for the start and end date for an election proposal are not properly validated in the backend and frontend. Lists can be changed outside the defined timespan.

Known Security Issues IAM System of VOTING Wahlvorschlag

The IAM system used in the Bug Bounty program for the product "VOTING Wahlvorschlag" includes specific PRE-production configurations, which may differ in some aspects from those in production. These elements are also included in the list below:

ID	Title	Summary
SEC-1490	Activated FeatureFlag AlwaysAllowedRedirectUris	The PRE environment contains a global redirect URI whitelist, which contains specific domains, independent of application-specific configurations.
SEC-1159 SEC-823	Token lifetime	A token lifetime of 24 hours is configured on the PRE environment.
SEC-919 SEC-823	RememberMe and cookie lifetime	A RememberMe and cookie lifetime of 1 week is configured on the PRE environment.
Misc.	Feature configurations	For test purposes, the following FeatureFlags are deactivated on the PRE environment: • PreventAccountDowngrade (2FA) • SecurityNotificationsEnabled • EnableImmutableFields • EnforceAnyRoleOnAuthorization
